

Work with JVS.
Change someone's world.

JVS Center for Economic Opportunity

Workforce Development that Meets YOUR Hiring Needs

In today's job market, it's tough to find employees who are ready to work on day one, especially for entry level positions in growth industries. JVS collaborates with each of our employer partners to discover the best ways to recruit and train individuals to meet your company's needs.

- 1 Develop customized training**
We work with you to develop training programs that meet your hiring needs, including job-related knowledge, technical skills, and soft skills such as problem-solving and work ethics.
- 2 Find and screen qualified applicants**
We take the time-consuming work off your hands by recruiting, interviewing, screening, and conducting background checks.
- 3 Train your future employees**
We provide job-skills training, career and life skills training, and if appropriate, arrange externships or apprenticeships with your company.
- 4 Prepare for placement and beyond**
Our training programs prepare individuals for externships, certification and employment at your company. We also provide continued support after placement to ensure success.

We're collaborating with JVS on an innovative partnership in which their academic and our care delivery enterprises work towards mutual goals that enhance and enrich the practice environment. JVS students have been better integrated into clinical operations and showed increased levels of critical thinking and decision making, improving the students' transition to work.

– Inna, *Directions of Operations,*
Citadel at Home

I've run many Food and Nutrition departments and staffing is always a challenge. I am most impressed with JVS's approach and follow-up. Thank you for your continued support and willingness to assist my team.

Innovative Workforce Development

Our Model

Our workforce development model is based on a two-fold value proposition.

- We help employers determine their needs, then recruit, train, and support people to meet those needs.
- We help people who face barriers to employment develop job-readiness skills so they can find and keep good employment with career paths.

Why Choose JVS?

We are committed to providing quality workforce training along with life and career skills that prepare your new employees to work on day one.

Let's discuss how we can work together to meet your hiring needs.

JVS Programs for Employee Training and Growth

CERTIFIED TRAINING PROGRAMS

JVS offers training courses for Certified Pharmacy Technicians, Certified Home Health Aides, Certified Nursing Assistants, and Certified Apartment Maintenance Technicians. We can dedicate a full class to your company or you may hire one or more graduates to meet your needs.

CUSTOMIZED TRAINING COURSES

JVS works with you to create a customized training course that meets your company's needs. If required, we will work with the appropriate certification boards to ensure the curriculum meets their standards -- and yours. During the training, your future employees learn job-specific skills and may participate in an externship at your company.

INDIVIDUAL PLACEMENT

You may not need a full training program. At any given time, we have over 1,000 active clients who are in various stages of finding employment. We can help you find and hire diverse employees in terms of age, race, language, ethnicity, and ability.

CORPORATE TRAINING FOR INCUMBENT WORKERS

Does your current staff need training in a specific area, such as leadership skills, quality control, or lean manufacturing principles? JVS works with you to implement classes that will help your staff develop professionally and help your company grow.

CUSTOMIZED PRODUCTION SERVICES

Your company can give back to the community while improving your bottom line through our custom production work – labeling, assembly, packaging, quality control, and more – at affordable rates. Please ask us for more details.
